The notification for the Avishkar Research Festival was received from the Shivaji University on 2nd February 2022. In that connection, UG and PG students from six different categories participated in the Avishkar. The Avishkar Committee in the college issued notices to the students and professors and informed them about this. For this, professors from various departments of Arts, Commerce and Science in the college prepared videos and a one page report of their students. A PRELIMINARY STUDY OF ANT DIVERSITY IN THE COLLEGE CAMPUS.

Abstract: Insects are the largest and most diverse group of organisms on Earth. They positively affect soil properties, plant and animal distribution, and limits of ecosystem. Ants create a stable ecosystem by recycling dead animals, insects, and excreta matter, placing nutrients back into the soil. In Present study College area were selected as a study area, Number of samples collected by various methods of trapping. Study shows that there is large diversity in ant species. Their nesting habit also differs from species to species.

Keywords: Ants, traps, Ecosystem.

<p>Introduction: Ant colonies scurry and scratch the soil. They create a stable ecosystem by recycling dead animals, insects, and decaying matter, placing nutrients back into the soil. Ant tunnels enhance water infiltration and circulate air in the ground which is beneficial not only to the soil, but plant roots as well. It can indirectly impact on local populations of other animal groups. Secondly, produce ants prey on a wide range of animals, including larger prey which can be attacked by large predators or red workers. Present study focus on study of diversity of ant species college campus which also focus on impact of ants on the ecosystem.</p> <p>Research Methodology: Study area: Botanical garden, parking area, cricket area, near the ladies main area, we planted near about 14 traps with a size of some centimeter in size.</p> <p>Oil trap, Honey trap, Chocolate trap, Sugar solution trap, Detergent trap, Leaf litter collecting, Dry grains, Coffee trap.</p>	<p style="text-align: center;">Observation</p>  <p style="text-align: center;">Figure 1: Spots for collection of ant specimens</p> <p>Present and preliminary study shows that there is large diversity in ant species. Their nesting habit also differs from species to species. Total 20 different ant species were collected and studied morphologically. Samples were also preserved for next level study in ZSL.</p> <p>References: 1. Ant diversity in the garden of Shriharji Maharajrao Chhatrapati Rajarshi Chhatrapati Shahu College, Kolhapur. Study Tour Report 2017-18

The study tour visit of the B.Sc. III Physics student was organized to visit **Department of Physics and School of Nano-science and Nanotechnology**, Shivaji University Kolhapur on **2nd February 2018** between **11:30 a.m. to 04:30 pm** under the guidance of **Dr. V.V. Killedar**. This visit is part of **B. Sc.III physics** curriculum of Shivaji University Kolhapur. There is a provision of 10 marks for the study tour.

On **2nd February 2018**, between **11:30 a.m. to 04:30 p.m.**, B.Sc.III students along with **Ms A. S. Patil** and **Mr. D. S. More** visited School of Nanoscience and Nanotechnology with the prior permission of **Prof. (Dr.) P. S. Patil**, Coordinator of school of nanoscience and technology. In the beginning, **Mr. Aviraj Teli** introduced us about the school and the instrumentation facilities available in this school. He told us about the importance of nanotechnology in coming future. He also given the information about the admission process, the courses run by this department.

Mr. Teli gave us information about various thin film deposition techniques such as Spray pyrolysis method, Electrospinning unit, SILAR method, Deep coating method, Spin coating method. He also gave information about the instruments which are used for the characterization of deposited thin films like Ultra probe Sonicator, UV- VIS spectrophotometer.

In the biology department of this school we have seen the refrigerator in which biological samples are maintained up to temperature -20°C . In this lab have seen centrifuge machines, electrophoresis unit autoclave biospectrometer etc.

After taking lunch break of half hour we went to Physics Department in the Shivaji University at **02.30 p.m.** with the prior permission of **Prof. (Dr.) V. J. Fulari**, Head department of physics. **Prof. K. Y. Rajpure** introduced us about the Department of Physics and the instrumentation facilities available in the department firstly we visited the solid state physics laboratory. In this laboratory we saw **Scanning Electron Microscope (SEM), Sputter Coater and FT-Raman spectrometer**. Then we visited to PIFC (Physics Instrumentation Facility Centre). In this centre we saw **X- ray diffractometer, IV characteristic of solar cell, Contact angle Goniometer, CT- Meter, Spectrofluorometer/ Fluoromax 4, LCR meter bridge, Field Emission- Scanning Electron Microscope (FE-SEM), surface area analyzer, Atomic Force Microscopy, Surface Profiler, Photoluminescence meter etc.**

Mr. Krushna gave information about scanning electron microscope (SEM). He told that scanning electron microscope is used to study morphology of any material. The cost of SEM is **65 lakhs**.

Then next instrument is sputter coater. It is used for preparation of samples using gold coating for SEM. The cost of sputter coater is **10 lakhs** rupees. Then Raman spectrometer, which is also used for the conformation of synthesized materials. It is cost **60 lakhs**. In common Facility centre there is surface area analyzer which is used to detect ion to the surface area of material by using wire atmosphere. The cost of these instruments is **12.5 lakhs**. He also gave information about FT-Raman, which is used to study chemical bonds in the material.

We also saw **LCR Meter Bridge** related to electronics this meter bridge is used for to measurement of inductance, capacitors and resistance.

Then we went to the important instrument which is **X-Ray Diffractometer**. Mr. Ram Surywanshi gave us information of X-ray diffractometer. X-ray diffraction is a powerful tool used to uniquely identify the crystalline phases present in materials and to study the structural properties like strain, grain size, phase composition, defect structure, and preferred orientation etc. The sample used for this instrument is in the form of powder or solid thin film.

Mr. Gopal Kulkarni gave us information about Surface profiler. This instrument is used to measure thickness of thin films. Also we saw solar stimulator and solar power system instruments like solar heater, solar P-V Panel etc. At the end we saw advanced FE-SEM which cost around **1.5 crore rupees**.

From this study tour we come to know that there are valuable & costly instruments useful for material characterization in research work. These instruments use basic principles of physics in their design. We are greatly inspired by the valuable information given by **Dr. K. Y. Rajpure**. We also know the scope of Physics subject in the development of technology.

We are very much thankful to **Dr. V. V. Killedar, HOD of physics** and **Ms. A. S. Patil & Mr. D.S. More** for arranging this study tour which creates awareness about research amongst the students. We are also thankful to **Principle Dr. C. J. Khilare** for giving permission to organize the study tour.

Study Tour Report

The study tour visit of the B.Sc. III Physics student was organized to visit **Department of Physics and School of Nanoscience and Nanotechnology**, Shivaji University Kolhapur on 7th May 2022 between 11.30 a.m. to 04.30 pm under the guidance of **Dr. V.V. Killedar**. This visit is part of **B. Sc. III physics** curriculum of Shivaji University Kolhapur. There is a provision of 10 marks for the study tour in Curriculum.

On 7th May 2022, between 11.30 a.m. to 04.30 pm, B.Sc. III students along with **Dr. A. S. Patil** and **Mr. R. T. Patil**, **Mr. N.V. Sankpal** visited School of Nanoscience and Nanotechnology with the prior permission of **Dr. Sharma**, Coordinator of school of Nanoscience and technology. In the beginning, **Mr. Navnath Chavan** introduced us about the school and the instrumentation facilities available in this school. He told us about the importance of nanotechnology in coming future. He also given the information about the admission process, the courses run by this department. Mr. Chavan gave us information about various thin film deposition techniques such as Spray pyrolysis method, Electrospinning unit, SILAR method, Deep coating method, Spin coating method. He also gave information about the instruments which are used for the characterization of deposited thin films like Ultra probe Sonicator, UV- VIS spectrophotometer.

In the Biology Department of this school we have seen the refrigerator in which biological samples are maintained up to temperature -20°C . In this lab we have seen centrifuge machines, electrophoresis unit, autoclave, biospectrometer etc.

After taking lunch break of half hour we went to Physics Department, Shivaji University, Kolhapur at **02.30 p.m.** with the prior permission of **Prof. (Dr.) K. Y. Rajpure**, Head Department of physics. **Prof. (Dr.) K. Y. Rajpure** introduced us about the Department of Physics and the instrumentation facilities available in the department firstly we visited the solid state physics laboratory. In this laboratory we saw **Scanning Electron Microscope (SEM), Sputter Coater and FT-Raman spectrometer**. Then we visited to PIFC (Physics Instrumentation Facility Centre). In this centre we saw **X-ray diffractometer, IV characteristic of solar cell, Contact angle Goniometer, CT-Meter, Spectrofluorometer/ Fluoromax 4, LCR meter bridge, Field Emission- Scanning Electron Microscope (FE-SEM), surface area analyzer, Atomic Force Microscopy, Surface Profiler, Photoluminescence meter etc.**

Research Scholar Mr. Satyajeet Patil gave information about scanning electron microscope (SEM). He told that scanning electron microscope is used to study morphology of any material. The cost of SEM is **65 lakhs**.

Then we saw the instrument sputter coater. It is used for preparation of samples using gold coating for SEM. The cost of sputter coater is **10 lakhs** rupees. Then Raman spectrometer, which is also used for the conformation of synthesized materials. It is cost **60 lakhs**. In common Facility centre there is surface area analyzer which is used to detect ion to the surface area of material by using wire atmosphere. The cost of these instruments is **12.5 lakhs**. He also gave information about FT-Raman, which is used to study chemical bonds in the material.

We also saw **LCR Meter Bridge** related to electronics this meter bridge is used for to measurement of inductance, capacitors and resistance.

Then we went to the important instrument which is **X-Ray Diffractometer**. Mr. LahuNamade gave us information of X-ray diffractometer. X-ray diffraction is a powerful tool used to uniquely identify the crystalline phases present in materials and to study the structural properties like strain, grain size, phase composition, defect structure, and preferred orientation etc. The sample used for this instrument is in the form of powder or solid thin film.

Ms Sarika Dhavale gave us information about Surface profiler. This instrument is used to measure thickness of thin films. We also saw solar stimulator and solar power system instruments like solar heater, solar P-V Panel etc. At the end Mr. Raviraj Patil gave us information about advanced FE-SEM which cost around **2.0 crore rupees**.

From this study tour we come to know that there are valuable & costly instruments useful for material characterization in research work. These instruments use basic principles of physics in their design. We are greatly inspired by the valuable information given by **Dr. K. Y. Rajpure**. We also know the scope of Physics subject in the development of technology.

We are grateful to **prof. Sharma**, Co-ordinator School of Nanoscience and Nanotechnology and **Prof. (Dr.) K. Y. Rajpure**, Head, Department of Physics for giving permission to visit the department. We are very much thankful to **Dr. V. V. Killedar, HOD of physics** and **Dr. A. S. Patil & Mr. R. T. Patil, Mr. N. V. Sankpal** for arranging this study tour which creates awareness about research amongst the students. We are also thankful to **Principle Dr. V. V. Killedar** for giving permission to organize the study tour.

STUDY TOUR REPORT:

The Department of Physics R.C. Shahu College, Kolhapur organized a study tour activity to Panhala Sky Research Centre at Pusati Buruj Panhala between 20 Feb, 2020 6.00PM to 21 Feb, 2020 6.00AM. This study tour is part of B.Sc III Physics curriculum.

The main objective of this study to us is to visit is to observstion the sky & to learn about various star & our solar system . We went to tour with Dr.V.V. Killedar sir, Patil sir, Patil mam, & Phadatare mam from RCSC, Kolhapur.

In the beginning we go to Panhala Fort & enjoyed a lot at that historic place. The fort is gorgeous which is one identification of Kolhapur. then we came to the sky observation centre, then Mr. Jatrakar sir told us about all our solar system & star & tough us many things about sky & full night we learned many things like what is Black hole? What is Nebula?

Black holes distort time & space around them. Black holes comes in miniature, middling & mammoth sizes super massive black hole Sagittarius lies at the heart of our milky way galaxy. The nearest black hole to the earth is 1600 light years away.

Carena nebula is known grand nebula, a large complex area of bright & dark nebulosity. Carena-Sagittarius Arm in nebula lies at an estimated distance between 6500 & 10000 light years from earth.

We seens planets like Saturn, Jupiter, Mars & we seen Moon & also Saptarshi Rashi they tought us one thing that how to find Dhruvatara & various Rashi & Nakshatra in Marathi etc.

We enjoyed the tour a lot & also learned many things about stars & solar system & at 21st Feb morning we went back to our college with lots of memories.

Studies have shown that students who are being experientially taught retain what they learn longer than those who are being traditionally taught. B.Sc. II students learn about various pests such as crop pests, stored grain pest etc. *Papilio demolus* is a lemon plant pest to study under applied zoology paper. After studying the entire morphology and life cycle of this pest B.Sc. II students were told to identify any stage on a lemon tree present in college campus. Outcome of such activity resulted in proper understanding of various life stages of lemon pest. After this activity students also tried to visit a lemon tree at their home and shared photos of different stages of the same pest.

ISRO counts down to launch second spacecraft to 'Touch Moon'

Chandrayaan-1 was India's first lunar probe. It was launched by the Indian Space Research Organisation in October 2008 and operated until August 2009. The mission included a lunar orbiter and an impactor. India launched the spacecraft using a PSLV-XL rocket, serial number C11, on 22 October 2008 at

00:52 UTC from Satish Dhawan Space Centre, at Sriharikota about 80 km (50 mi) north of Chennai. Prime Minister Atal Bihari Vajpayee announced the project on course in his Independence Day speech on 15 August 2003.

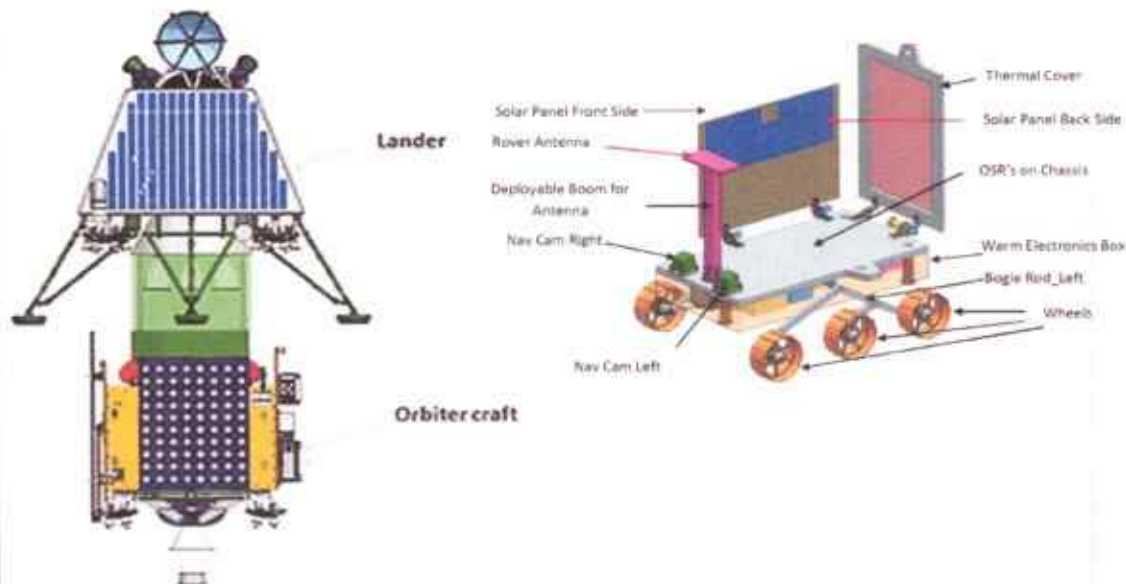

The mission was a major boost to India's space program, as India researched and developed its own technology in order to explore the Moon. The vehicle was inserted into lunar orbit on 8 November 2008. On 14 November 2008, the Moon Impact Probe separated from the Chandrayaan orbiter at 14:36 UTC and struck the south pole in a controlled manner, making India the fourth country to place its flag on the Moon. The probe hit near the crater Shackleton at 15:01 UTC, ejecting sub-surface soil that could be analysed for the presence of lunar water ice. The estimated cost for the project was 386 crore (US\$54 million). The remote sensing lunar satellite had a mass of 1,380 kg at launch and 675 kg in lunar orbit. It carried high resolution remote sensing equipment for visible, near infrared, and soft and hard X-ray frequencies. Over a two-year period, it was intended to survey the lunar surface to produce a complete map of its chemical characteristics and three-dimensional topography.

CHANDRAYAAN 2

Chandrayaan-2 is India's second lunar exploration mission after Chandrayaan-1 developed by the Indian Space Research Organisation (ISRO), the mission is planned to be launched to the Moon by a Geosynchronous Satellite Launch Vehicle Mark III (GSLV Mk III). It includes a lunar orbiter, lander and rover, all developed by India.

Chandrayaan-2 is scheduled to launch in April 2019 and will attempt to soft land a lander and rover in a high plain between two craters, Manzinus C and Simpelius N, at a latitude of about 70° south. If successful, Chandrayaan-2 will be the second mission to land a rover near the lunar south pole. According to ISRO, this mission will use and test various new technologies and conduct new experiments. The wheeled rover will move on the lunar surface and will perform on-site chemical analysis. The data will be relayed to Earth through the Chandrayaan-2 orbiter, which will piggyback on the same launch. The mission is planned to fly on a Geosynchronous Satellite Launch Vehicle Mark III (GSLV Mk III) with an approximate lift-off mass of 3877 kg from Satish Dhawan Space Centre on Sriharikota Island. As of February 2018, the mission has an allocated cost of 800 crore (approximately US\$125 million).

➤ Orbiter

- The orbiter will orbit the Moon at an altitude of 100 km.
- The mission will carry five instruments on the orbiter. Three of them are new, while two others are improved versions of those flown on Chandrayaan-1.
- The approximate launch mass will be 2379 kg. The Orbiter High Resolution Camera (OHRC) will conduct high-resolution observations of the landing site prior to separation of the lander from the orbiter.
- Interfaces between the orbiter and its GSLV Mk II launch vehicle have been finalised. The orbiter's structure was manufactured by Hindustan Aeronautics Limited and delivered to ISRO Satellite Centre on 22 June 2015.

➤ Vikram Lander

- The mission's lander is called *Vikram*, named after Vikram Sarabhai (1919-1971) who is widely regarded as the father of the Indian space programme.
- The *Vikram* lander will detach from the orbiter and descend to a lunar orbit of $30 \text{ km} \times 100 \text{ km}$ using its 800 N liquid main engines. It will then perform a comprehensive check of all its on-board systems before attempting to land on the lunar surface.
- Unlike Chandrayaan-1's Moon Impact Probe, the *Vikram* lander will make a soft landing, deploy the rover, and perform some scientific activities for approximately 15 days.
- The approximate combined mass of the lander and rover is 1,471 kg.
- The preliminary configuration study of the lander was completed in 2013 by the Space Applications Centre (SAC) in Ahmedabad.
- The lander's propulsion system consists of eight 50 N (thrusters for attitude control and five 800 N liquid main engines derived from ISRO's 440 N Liquid Apogee Motor. Initially, the lander design employed four main liquid engines, but a centrally mounted engine was added to handle new requirements of having to orbit the Moon before landing.
- The additional engine is expected to mitigate upward draft of lunar dust during the soft landing.

Head

Department of Physics
Rajarshi Chh. Shahu College, Kolhapur.

- Some associated technologies include a high resolution camera, navigation camera, hazard avoidance camera, an 800 N throttleable liquid main engine and attitude thrusters, altimeter, velocity meter, accelerometer, and the software needed to run these components.
- The lander's main engine has successfully undergone a high altitude test for duration of 513 seconds, and closed loop verification tests of the sensors, actuators and software were completed in 2016.
- Engineering models of the lander began undergoing ground and aerial tests in late October 2016, in Challakere in the Chitradurga district of Karnataka. ISRO created roughly 10 craters on the surface to help assess the ability of the lander's sensors to select a landing site.

NASA Launched First Spacecraft to 'Touch Sun'

NASA counted down on Friday to the launch of a \$ 1.5 billion spacecraft that aims to plunge into the Sun's sizzling atmosphere and become humanity's first mission to explore a star.

The car-sized Parker Solar Probe is scheduled to blast off on a Delta IV Heavy rocket from Cape Canaveral, Florida early on Saturday. The 65-minute launch window opens at 3:33 am (local time), and the weather forecast is 70 percent favorable for takeoff, NASA said. The probe's main goal is to unveil the secrets of the corona, the unusual atmosphere around Sun. Not only is the corona about 300 times hotter than the Sun's surface, it also hurls powerful plasma and energetic particles that can unleash geomagnetic space storms and disrupt Earth's power grid. "The Parker Solar Probe will help us do a much better job of predicting when a disturbance in the solar wind could hit Earth," said Justin Kasper, one of the project scientists and a professor at the University of Michigan. The probe is protected by an ultra-powerful heat shield that is just 4.5 inches thick (11.43 centimeters).

The shield should enable the spacecraft to survive its close shave with the center of our solar system, coming within 3.83 million miles (6.16 million km) of the Sun's surface. The heat shield is built to withstand radiation equivalent up to about 500 times the Sun's radiation here on Earth. Even in a region where temperatures can reach more than a million degrees Fahrenheit, the sunlight is expected to heat the shield to just around 2,500 degrees Fahrenheit (1,371 degrees Celsius). But if all works as planned, the inside of the spacecraft should stay a cooler 85 F (29 C).

The goal for the Parker Solar Probe is to make 24 passes through the corona during its seven-year mission. "The sun is full of mysteries," said

Nicky Fox, project scientist at the Johns Hopkins University Applied Physics Lab. "We are ready. We have the perfect payload. We know the questions we want to answer."

The tools on board will measure the expanding corona and continually flowing atmosphere known as the solar wind, which solar physicist Eugene Parker first described back in 1958.

Parker, now 91, recalled that at first, some people did not believe in his theory. But then, the launch of NASA's Mariner 2 spacecraft in 1962 - becoming the first robotic spacecraft to make a successful planetary encounter - proved them wrong. It was just a matter of sitting out the deniers for four years until the Venus Mariner 2 spacecraft showed that, by golly, there was a solar wind," Parker said earlier this week. He added that he is "impressed" by the Parker Solar Probe, calling it "a very complex machine." Scientists have wanted to build a spacecraft like this for more than 60 years, but only in recent years did the heat shield technology advance enough to be capable of protecting sensitive instruments, according to Fox.

Tools on board will measure high energy particles associated with flares and coronal mass ejections, as well as the changing magnetic field around the Sun. "We will also be listening for plasma waves that we know flow around when particles move," Fox added. "And last but not least, we have a white light imager that is taking images of the atmosphere right in front of the Sun." When it nears the Sun, the probe will travel rapidly enough to go from New York to Tokyo in one minute - some 700,000 km per hour, making it the fastest human-made object.

A TRIBUTE TO PROF U R RAO

24th July 2017

Prof. Rao was a versatile space scientist, a technologist par excellence, and a passionate space application protagonist, all rolled into one; with sharp analytical bent of mind and enormous intellectual ability with uncanny knack of grasping the contemporary happenings; and astounding ability to quickly make back-of-the-envelope computations for complex solutions and decision making. While he was a tough task master with deep insight, abundant enthusiasm and indefatigable tenacity, and penchant for speedy action, his ability to instantly connect with his subordinates is an attribute often cited as his best quality with each one of them has one story or other to tell about his personal interactions and experience with him.

Above all, Prof. U.R.Rao was a great Institution builder of global repute, and ranks along with Dr Vikram Sarabhai and Prof. Satish Dhawan as the one who brought the vision and mission focus in the Indian space programme with unstinted commitment to align the goals of the organisation with national development. In this, he had to take in his stride the brunt of the innumerable initial difficulties, obstacles and failures of the satellites and launch vehicles in the experimental and its transition to operational era. He steadfastly brought in high levels of professional competence, mutual respect, and team

A TRIBUTE TO CDS BIPIN RAUT

General Bipin Rawat was the first CDS of India who was killed in an IAF chopper Mi-17V5 crash on 8 December 2021 in Tamil Nadu's Coonoor, along with his wife Madhulika Rawat and staff. 13 out of the 14 members aboard the chopper have been declared dead. The Indian Army has positively identified CDS Rawat, his wife, and Brig Liddar who were laid to rest on 10 December 2021. The remaining 10 bodies will be kept in the mortuary of the Army Base Hospital till positive identification is completed. A tri-service inquiry led by Air Chief Marshal Manavendra Singh has been ordered into the case and the black box has been retrieved. At this sad unfortunate moment, take a look at the life of CDS Bipin Rawat.

Chief of Defense General Bipin Rawat was born in Uttarakhand. His Father, Laxman Singh Rawat, served the Indian Army and served on the degree of lieutenant general. His mother was the daughter of an ex-MLA from Uttarakhand's Uttarkashi. General Bipin Rawat and his wife Madhulika Rawat survived two girls named Kritika Rawat and again.

- **Education**

He received his formal education at Cambrian Hall School in Dehradun and St. Edward's School in Shimla and later joined the National Defense Academy, Khadakwasla, and the Indian Military Academy, Dehradun, where he was honored with the Sword Honorary. He also graduated from Defense Services Staff College (DSSC), Wellington, and the Senior Command Course of the United States Army Staff and Command College, Fort Leavenworth, Kansas. **SIR ROGER PENROSE'S NOBEL PRIZE IN
PHYSICS AND SURPRISE IT BRINGS**

The announcement of this year's Nobel Prize in Physics came as a surprise. Two astrophysicists, Reinhard Genzel and Andrea Ghez, shared half of the prize "for the discovery of a supermassive compact object at the centre of our galaxy". The other half, the real surprise: it belonged to Sir Roger Penrose. The award does not say as much about his accomplishments as it does about the Nobel Prize itself.

Penrose is a phenomenal mathematical physicist, a unique thinker in every topic he gets involved in. His powerful visual mind has led him to leave his fingerprints in practically all the areas he has worked. These fingerprints range from developments in notation and invention of ingenious diagrams to shaping the full theoretical framework used to understand the phenomena. Elaborating a new notation in mathematics is far more than creating new symbols; it is using representations to aid our brains to think, in a similar way we use our language as an aid to form concepts and operate them. Not only do diagrams help with visualisation of certain properties but also invite the formulation of questions and provide tools for addressing them. Notation and diagrams are both the effect and the cause of Penrose's distinctive geometrical mind: they come as the product of his recreation of established theories and propel the continuation of

ORGANIZING DEPARTMENT-WALLPAPER COMMITTEE

The Wallpaper Committee of the college organized a poster exhibition on **Cracker free Diwali celebration during covid19 situation** on Monday, 9th Nov.2020 at 12.00 pm . Our institution took initiative to educate the nearby slum dwellers to take the adequate public health precautions during festive occasion and the health hazards of use of crackers during COVID-19 situation. The cured or quarantined patients equally face health issues. Its necessary to ensure cap on number of people gathering for any event .Although the COVID-19 curve in Maharashtra is bending downwards, we have to be vigilant against the disease. In spite of the multiple efforts by the state, Diwali festival may cause a rise in cases as the patients may be asymptomatic or carrying mild symptoms leading to the community spread, So instructions regarding face covers/masks/sanitizers were given to the children present on the occasion. The poster display and the awareness pamphlet distribution was done.Nearly 10 teachers along with 11 students participated in this activity..

'एखादे भौगोलिक परिक्षेत्र गाव निवडून तेथील प्राकृतिक व मानवी घटकांचा शास्त्रीय दृष्टीकोनातून केलेला अभ्यास म्हणजे ग्रामसर्वेक्षण होय.' ग्रामसर्वेक्षणात आपण ज्या स्थळाला भेट देतो, तेथील लोकसंख्या व त्यातील घटक, लोकसंख्येची घनता, वितरण, स्त्री-पुरुष प्रमाण, वयोगट, शिक्षण, व्यवसाय, आर्थिक स्थिती या घटकांचा अभ्यास करतो. याबरोबरच भाषा, धर्म, वंश, जात या घटकांचा ही अभ्यास केला जातो.

४.१२ गिरगांव गावातील समस्या:

गावातील ग्रामस्थांच्या मुलाखती घेत असताना अनेक ग्रामस्थांनी आमच्यासमोर समस्यांचा पाढाच वाचला. त्या समस्या खालीलप्रमाणे.

- १) संपूर्ण कच्चे रस्ते
 - २) एस. टी. बसची सुविधा नाही
 - ३) माध्यमिक व उच्चशिक्षणाचा अभाव
 - ४) भूमिगत गटारांचा अभाव
 - ५) लोकप्रतिनिधींची गावाबद्दलची अनास्था
 - ६) वैद्यकीय सुविधांचा अभाव
 - ७) वाचनालयाचा अभाव
- देशाला स्वातंत्र्य मिळून ७३ वर्षे झाली तरी गिरगांव हे गाव आसपासच्या मुख्य गावांना पक्या रस्त्यांनी अजूनही जोडलेले नाही. जे कच्चे रस्ते आहेत ते सुद्धा पावसाळ्यात वाहतुकीस उपयुक्त ठरत नाहीत.
 - गावात बसची एकही फेरी होत नाही. त्यामुळे मुख्य बाजारपेठेत जाण्यासाठी खाजगी वडाप ची वाट पहावी लागते.
 - माध्यमिक शिक्षणासाठी ८ किमी पायी प्रवास करावा लागतो. तर उच्चशिक्षणासाठी त्यांना मलकापूर येथे जावे लागते.
 - गाव डोंगराळ प्रदेशात स्थित असल्यामुळे आणि गावातील मतदार संख्याही कमी असल्यामुळे तालुका व जिल्हा स्तरावरील लोकप्रतिनिधी यांचा गावाकडे पाहण्याचा दृष्टीकोन म्हणावा तितका चांगला नाही.
 - गावामध्ये कसल्याही प्रकारची वैद्यकीय सुविधांची उपलब्धता नाही. वाचनालय सुद्धा नाही. पावसाळ्यात जनजीवनावर मोठा परिणाम होतो शिवाय एखादी व्यक्ती आजारी पडल्यास डोली तून दवाखान्यात न्यावे लागते.
 - रोजगाराची सोय नसल्याने तरुण वर्ग मुंबई, कोल्हापूर ला हमाली, घरकाम, माळीकाम, हॉटेलमध्ये काम करून आपला उदरनिर्वाह करताना दिसून आले.

प्रकरण-५**निष्कर्ष व उपाययोजना**

'गिरगांव गावातील सामाजिक-आर्थिक स्थितीचा अभ्यास' हा विषय क्षेत्र अभ्यासासाठी निवडला आहे. या गावातील सामाजिक-आर्थिक स्थितीचा अभ्यास केल्यानंतर आम्ही खालील निष्कर्षांप्रत पोहचलो.

५.१ निष्कर्ष:

- १) गिरगांव हे गाव सह्याद्रीच्या कुशीत पर्वतीय-डोंगराळ प्रदेशातील असल्याने गावच्या भूपृष्ठरचनेमध्ये विविधता दिसून आली. गावचे हवामान उष्ण कटिबंधीय मोसमी प्रकारचे आहे. सर्वत्र तांबडी, काळी व गाळाची मृदा आढळते. येथे उष्ण कटिबंधीय पानझडी वने आढळतात.
- २) गावाची एकूण लोकसंख्या ६०३ इतकी असून त्यापैकी ४९.७५ टक्के पुरुष तर ५०.२५ टक्के स्त्रिया आहेत. गावातील साक्षरतेच्या प्रमाणामध्ये स्त्रियांपेक्षा पुरुष साक्षरता जास्त आहे. वयोरचनेचा विचार करता १६-५९ वर्षे या वयोगटात सर्वाधिक म्हणजे ३६८ इतकी लोकसंख्या आहे.
- ३) गावाचा प्रमुख व्यवसाय शेती असून त्यामध्ये गुंतलेल्यांचे प्रमाण ७५.६२ टक्के इतके आहे.
- ४) शेती प्रामुख्याने खरीप हंगामात केली जाते. कारण ९० % शेती ही पावसाच्या पाण्यावर अवलंबून आहे. शेतीमध्ये भात, नाचणी, वरी व अल्प प्रमाणात गहू ही पिके घेतली जातात.
- ५) २०,००० ते ४०,००० रुपये. वार्षिक उत्पन्न असणाऱ्या गटात सर्वाधिक म्हणजेच २८ इतकी कुटुंबे आहेत.
- ६) गिरगांव गावात ६१.३९ टक्के लोक विवाहित आहेत तर ३८.६१ टक्के लोक अविवाहित आहेत.
- ७) गावामध्ये सर्व लोक हे हिंदू धर्माचे असून त्यामध्ये मराठा, महार, धनगर या जातींचे प्राबल्य दिसून आले.
- ८) गिरगांव गावात शैक्षणिक सुविधांचा अभाव आहे. एकूण लोकसंख्येतील सुमारे २६४ लोक साक्षर आहेत त्यामध्ये पुरुष साक्षरता ६१.७६ टक्के तर स्त्रियांची साक्षरता ४३.६७ टक्के आहे.
- ९) गावामध्ये आजही ८५.७१ टक्के एकत्र कुटुंब पद्धत असल्याचे आढळते.
- १०) गावामध्ये करमणुकीच्या साधनांमध्ये टीव्हीचे व मोबाईल चे प्रमाण जास्त आहे.
- ११) सदर गावामध्ये कच्च्या घरांचे प्रमाण जास्त असून ते ८७.१४ टक्के इतके आहे.

१२) एकूण सर्व्हे केलेल्या ७० कुटुंबांपैकी ६७ कुटुंबांकडे बंदिस्त बाथरूम, ६७ कुटुंबांकडे स्वतःचे संडास, ४४ कुटुंबांकडे वीज आणि ६६ कुटुंबांनी गटारांची सुविधा केलेली आहे.

१३) भात या प्रमुख पिकाबरोबरच नाचणी, वरी व काही प्रमाणात गव्हू उत्पादन घेतले जाते.

१४) गिरगांव गावामध्ये कोरडवाहू या शेतीपद्धती प्रचलित आहेत. जलसिंचनाच्या पारंपरिक पद्धतीचा (पाट पद्धती) सर्हासपणे वापर केला जात आहे.

१५) गिरगावमध्ये शेतीस पूरक म्हणून पशुपालन व्यवसाय केला जातो.

१६) कच्चे रस्ते, एस. टी. बसची वानवा, माध्यमिक व उच्चशिक्षणाचा अभाव, भूमिगत गटारांचा अभाव, लोकप्रतिनिधीची गावाबद्दलची अनास्था आणि वैद्यकीय सुविधांचा अभाव या प्रमुख समस्या आढळून आल्या.

५.२ उपाययोजना:

१) सदर गावामध्ये हायस्कूलची स्थापना करणे अत्यंत गरजेचे आहे की जेणेकरून विद्यार्थ्यांची होणारी पायपीट थांबवता येईल.

२) गिरगांव या गावात पुरुषांपेक्षा स्त्रियांचे उच्च शिक्षणातील प्रमाण कमी आहे, म्हणून स्त्रियांमध्ये उच्च शिक्षणाचे महत्त्व पटवून देणे गरजेचे आहे.

३) गिरगांव हे गाव लवकरात लवकर बाजारपेठांच्या ठिकाणांशी पक्क्या रस्त्यांनी जोडणे आवश्यक आहे.

४) गावाला एस. टी. बसची सुविधा पुरवणे अत्यंत गरजेचे आहे.

५) आरोग्याच्या दृष्टीने गावामध्ये भूमिगत गटारे बांधणे आवश्यक असून यामध्ये ग्रामपंचायतीने पुढाकार घेतला पाहिजे.

६) गावामध्ये प्राथमिक आरोग्य केंद्र असणे आवश्यक आहे कारण ग्रामस्थांना दवाखान्यासाठी दूर जावे लागते.

७) जलयुक्त शिवार अभियानामध्ये प्रत्येकाने सहभाग देणे जरूरीचे आहे.

८) लोकप्रतिनिधी व शासनाने त्वरित गावाच्या समस्या सोडविण्यासाठी प्रयत्न करणे गरजेचे आहे.

"Soil and Water analysis camp at Valivade, Tal- Karveer
Dist-Kolhapur".

Date: 20/05/2022

The Rajarshi Chhatrapati Shahu College Kolhapur Department of Chemistry successfully conducted a "Soil and water analysis camp at Valivade, Tal Karveer Dist-Kolhapur" On dated 18th May 2022. Our main objective behind this extension activity is to help the poor and needy Farmers for their soil and water analysis

Soil Survey is one of the important tools to assess the nutrient requirement for a crop/cropping sequence. This helps to economize on cost of fertilizers and also in increasing fertilizers use efficiency. There are 514 soil-testing laboratories in India with a capacity of about 6.5 million samples per annum. In order to provide soil-testing facilities to all 106 million farms holding in a reasonable period of time, the existing analyzing capacity of the soil testing program needs to be augmented almost 15-20 times.

The analysis of water will be done by testing different physicochemical parameter like pH ,electrical conductivity (EC), total dissolved solids (TDS), dissolved oxygen (DO), salinity. Total alkalinity, hardness etc. These tests will be carried out using techniques like microprocessor based water analysis kit -172, spectrometer and titration.

From our department four faculties namely Dr. S.P. Pawar, Dr. K. V. Gaikwad, Mr..S. A .Shinde ,Mr.P.R.Birmule, Miss.S.P.Korane ,Miss.kopardeS. V. Miss. Bote P. P. Miss. Kamble P. S. and Two Students arranged this camp with an advanced instruments available in our chemistry Department. We have collected the soil and water samples from different areas of Valivade village. Finally we have analyzed Total 25 samples of Soil and Water with respect to following tests, Alkalinity, Salinity, Dissolved oxygen, Temperature, pH, Conductivity, TDS, Nutrient Element Like Na. Then after analysis we have prepared the report and Consult them about the use of Fertilizers and Water. A proper soil tests will help to ensure the application of enough fertilizer to meet the requirements of the crop while taking advantage of the nutrients already present in the soil and water.
