**Subject: Permission for Industrial Visit – B.Sc. Microbiology  
Students.**

**Respected Sir/Madam,**

On behalf of the Rajashri Chhatrapati Shahu College, Kolhapur & Department of Microbiology, we request your kind permission to arrange an industrial visit to your esteemed Gokul Milk Processing Unit on 23<sup>rd</sup> February 2026 at 9:30 AM for the students of B.Sc. I, II & III (Microbiology)

The purpose of this visit is to provide practical exposure to students regarding milk processing techniques, quality control, and microbiological standards followed in dairy industries, which form an important part of their academic curriculum.

Approximately 15 students along with 01 faculty members will be visiting the unit. We assure you that all students will maintain discipline and follow the rules and regulations of your organization during the visit.

We kindly request you to grant permission for the same.

Thanking you,

Yours faithfully,

**Study Visit to Gokul Milk Processing Unit, Gokul Shirgaon Kolhapur.**

**Date: 23/02/2026**

On 23rd February 2026 at 9:30 AM, a visit was made to the Gokul Milk Processing Unit as part of an educational/industrial visit to understand the milk processing system and gain practical knowledge about the dairy industry. Upon arrival, the group was warmly welcomed and Mr. S.V. Pant sir gave instructions regarding safety and hygiene, including the use of hair caps, masks, and shoe covers. The milk collection process was explained, where milk is collected from farmers and tested for quality parameters such as fat content, SNF, and adulteration before acceptance. The milk then undergoes several processing stages, including filtration to remove impurities, cooling to prevent spoilage, pasteurization to kill harmful bacteria, and homogenization to ensure uniform distribution of fat. After processing, the milk is packed using automated machines into pouches. The unit also produces various dairy products such as curd, paneer, butter, ghee, and flavoured milk. Overall, the visit was very informative and helped in understanding the complete process of milk from collection to final packaging, highlighting the importance of technology, hygiene, and quality control in the dairy industry.

**Outcomes :** 1) Visit helped students understand the milk processing process practically.  
2) This visit increased students awareness about hygiene, quality control, role of technology in dairy industry.
