### Group Discussion

### Topic - Female Feticide

Date- 26/09/2025

Women are murdered all over the world. But in India a most brutal form of killing females takes place regularly, even before they have the opportunity to be born. Female feticide the selective abortion of female fetuses is killing upwards of one million females in India annually with far-ranging and tragic consequences. In some areas, the sex ratio of females to males has dropped to less than 8000:1000. Females not only face inequality in this culture, they are even denied the right to be born. Although female infanticide has long been committed in India, feticide is a relatively new practice, emerging concurrently with the advent of technological advancements in prenatal sex determination on a large scale in the 1990s. While abortion is legal in India, it is a crime to abort a pregnancy solely because the fetus is female. Strict laws and penalties are in place for violators. These laws, however, have not stemmed the tide of this abhorrent practice. In this activity students discuss the socio-legal conundrum female feticide presents, as well as the we realize the effect of having too few women in Indian society

#### Outcome:

To establish equality between men and women

#### Beneficiaries

33
